

## **TCS LABORATORY HIGH TEMPERATURE STEAMER MACHINE**

**Truly we fulfill your wish**

## High Temperature Steamer

We, at TCS INDUSTRIES manufacturing, and supplying of **High Temperature Steamer**. Manufacturer by our skilled manpower using supreme quality of raw materials, these machines are demanded for their impeccable performance, robust construction and corrosion resistant surface. These streamers are widely used for applications like high temperature steaming, saturated steaming and flash ageing and thermo soling at atmospheric pressure. We duly check **High Temperature Steamer** on various quality parameters to offer flawless range to clients.

### Features

High temperature Steamer is a versatile machine useful for applications like saturated steaming, high temperature steaming, flash aging and thermo soling at atmospheric pressure.

- Maximum sample size 45cm x 30 cm.
- Automatic pin frame transfer with pre selectable dwell time.
- Electrical heating for steam generation provided.
- Steam super heating up to 250°C possible.
- For uniform distribution of steam or dry heat in the machine, blower is provided.
- Nozzle provided for external steam supply.
